

myone

gaming and betting
solutions

Italian design

Founded in 2000, MYONE designs and manufactures innovative products and technology solutions for the global gaming industry. Our product line includes the gaming and betting machines, gaming signage, backlit signage, toppers, counter tops, back closings, and more different furniture solutions. We are constantly trying to diversify the gaming and betting experience and look at the many options in the modern industry to attract more players and design new ways.

● **DESIGNING**

A tireless research into innovation and rule adaptations too are the base point of each our designs. New solutions, original workable-proof models and state-of-the-art electronic components are whole thought, designed and tested before their industrialization.

● **PRODUCTION**

Laser cutting-edge machines, robotic benders, an internal welding shop allow us a direct and complete production beyond 4000 cabinets par year. Ever-full stocks ready to fill orders within 24hours (even huge lots) with "fresh made" goods are our strong point.

● **ASSEMBLY**

The internal development of the complete manufacturing process, from the manufacture to mechanical/ electronic assembly, allow us to test machines on high precision level margins.

● **CUSTOMER CARE & SPARE PARTS**

We have already designed each gaming and betting machine following versatility and easy maintenance criteria, certifying the maximum reliability as closer as possible. Furthermore, it is available a ready-made customer care in the remote event of a lack, prompt to offer an immediate solution (spare parts\ replacement machines).

Betting Solutions

Interactive gaming and betting experience with perfect terminal solutions

MYONE offers a wide range of turnkey terminal solutions, that provide an unique gaming and betting experience to your customers. Our world leading self-service terminals which refer almost to all the top players in the industry. Our market share increases rapidly because the space-saving terminals are ideal for cafe's or bars. Also more and more betting shops rise to the self-service terminals from MYONE. The terminals are very easy to maintain because the equipment components are chosen carefully.

The kiosk models of MYONE are equipped with customized PC solutions, TFT display with touch screen and a more than 100,000 time-implemented I / O Controller with cctalk interface. All components comply with the requirements of a modern gaming/betting terminals. Even the color can be individually adapted to the corporate design of the customer, because the terminals are assembled in the factory in Verona. Depending on the needs of the customer bill reader, scanner or hopper can be mounted.

Betting Solutions

Interactive gaming and betting experience with perfect terminal solutions

CABINET OPTIONS FOR EVERY NEED

Choose your device from a set of four different premium terminal options. Each one of the terminals has been designed for a special purpose and one of them will fit your requirements for sure.

FOCUSED ON THE PLAYER

Special passion has been put into design and player comfort. This results in cabinets that are absolute design highlights and will enlighten every location. Carefully considered screen positioning, easy to reach button panels and plenty of space for leg clearance provide for comfort of your player.

CHOOSE YOUR FAVORITE COLOR

You can choose any color you want for your terminal. It is so simple to match the terminal to your corporate colors instead of going the other way around.

FULL CONFIGURATION FLEXIBILITY

All components can be configured to your needs. The sky is the limit. Depending on your needs bill validators, scanners, hoppers or any other devices can be integrated to your device.

COMPATIBLE WITH INDUSTRY STANDARDS

All terminals support common industry standards, like the ccTalk protocol. The controller system is proven more than 100,000 times, so you can trust in reliability and stability of the machine.

Betting Solutions

Professionally designed

an elegantly curved design showcases a modern look that easily draws the client's attention

Robust metal housing

Robust and high-grade metal enclosure

Compact, freestanding kiosk

this spacesaving unit allows for outfitted components (bar code and card readers, pin pads and printers)

Adaptable front panel

components and functionality can be quickly and easily replaced to specified requests

22 inch touch screen

highly responsive touch screen display

Modern reliable pc

powerful 24/7 windows/linux based computer unit with intel cpu

Branding options

custom colors and labeling are available

Maintenance up to 5 years

long-term warranty and support

Rear extension enclosure

easy integration of heavy-duty components

Easy service access

All access doors open at the front allowing for fast and easy maintenance access

Jeremy 360° re-designs the tablet kiosk combining innovative design and functionality. Compatible with the most of the tablet on the market, it's enough to change its frame, it has a "push & lock" closure for a rapid access to the tablet ensuring the maximum antitheft safety. Its case can rotate from landscape to portrait and front/rear facilitating typical operations in the stores as well as gradient regulation. The stand is mounted on a rotating plate and can be fixed on a bench or used freely. Made with robust metal dust painted is perfectly "radio transparent", for wifi, bluetooth and 3G. Perfect for business, entertainment rooms, betting rooms and gaming.
